

NATIONAL BOTANICAL RESEARCH INSTITUTE
AGREEMENT FOR THE SUPPLY OF BIOLOGICAL MATERIAL
FROM THE REPUBLIC OF NAMIBIA
FOR SCIENTIFIC RESEARCH PURPOSES

The National Botanical Research Institute (NBRI) is a subdivision within the Directorate of Forestry of the Ministry of Agriculture, Water and Forestry (MAWF) and its mission is "to promote the understanding, conservation and sustainable use of Namibian plants for the benefit of all".

In its work, the NBRI intends to honour the letter and spirit of the 1992 Convention on Biological Diversity, the 2010 Nagoya Protocol on Access to Genetic Resources and the Fair and Equitable Sharing of Benefits Arising from their Utilization, the 1973 Convention on International Trade in Endangered Species of Wild Fauna and Flora, the 2004 International Treaty on Plant Genetic Resources for Food and Agriculture, and all other relevant international instruments to which Namibia is a signatory, and all national laws concerning biodiversity.

On receipt of the Agreement **signed by the Recipient below** and because the Recipient has agreed to comply with the terms and conditions set forth in this Agreement, the NBRI will supply to the Recipient such of the biological material (the Material)¹ requested by the Recipient as is, in the NBRI's judgement, reasonable and appropriate.

Such biological Material as is supplied to the Recipient shall be accompanied by a copy of this Agreement and an itemised list ("the Schedule") of the biological material being supplied, clearly stating the identity and quantity of Material supplied, the Purpose for which it is supplied, and any additional conditions that might apply to the supply of the Materials.

The Recipient acknowledges that he/she is acting as a duly authorised representative of the institution he/she represents, and that the terms of this Agreement shall be binding on all present and future employees of his/her organisation, for as long as this agreement remains in force.

The supply of any and all Biological Material by the NBRI to the Recipient, including any Material to be supplied under this agreement, will be subject to the following conditions:

1. Subject to clauses 2 and 4 below, the Recipient may use the Material and progeny or derivatives thereof (such as modified or unmodified extracts) for non-commercial purposes only.
2. The Recipient will provide NBRI with a fair and equitable share of any benefits obtained by the Recipient arising out of any utilisation by the Recipient of the Material or its progeny or derivatives, including benefits such as research results, copies of papers, acknowledgement of the NBRI as the Source of the Material.
3. **Under this Agreement, the Recipient may not commercialise² the Material or any progeny or derivatives thereof.**

¹ "Biological Material" shall include plants, plant parts or propagation material (such as seeds, cuttings, roots, bulbs, corms or leaves) fungi or other fungal material and any other material of plant, microbial, fungal or other origin and the genetic resources contained therein.

"Genetic Resources" shall mean any biological material of actual or of potential value containing functional units of heredity including DNA, transferred under this Agreement and its progeny and derivatives, including modified or unmodified extracts and purified compounds

² "Commercialise" and "Commercialisation" shall include but not be limited to any of the following: sale, filing a patent application, obtaining or transferring intellectual property rights or other tangible or intangible rights by the sale or licence or in any other manner, commencement of product development, conducting market research and seeking pre-market approval.

4. If, at any point, in the future the recipient wishes to commercialise the Material or its progeny or derivatives, the Recipient must first obtain the written permission of the NBRI. Any commercialisation to which NBRI agrees will be subject to a separate agreement between the Recipient and NBRI consistent with NBRI's policy.
5. **The Recipient may not transfer** the Material or any progeny or derivatives thereof to any third party³ other than the Recipient or NBRI without the prior informed consent, in writing, of NBRI and then only under legally binding written agreement containing terms no less restrictive than those contained in this Agreement unless otherwise agreed in writing by NBRI. The Recipient agrees to take every reasonable precaution to prevent the material coming into the possession of any unauthorised third party.
6. NBRI makes no representation or warranty of any kind whether express or implied:
 - (a) as to the identity, safety, saleability or fitness for any particular purpose of the Material or its progeny or derivatives or
 - (b) that the Material provided to the Recipient under this Agreement is or will remain free from any further obligation to obtain prior informed consent from, to share benefits with or to comply with restrictions on use imposed by the national or local authorities. The Recipient will indemnify NBRI from any and all liability arising out of the Material or its progeny or derivatives and their use.
7. The biological Material is provided at no cost, or with an optional transmittal fee solely to reimburse the NBRI for its collection, preparation and distribution costs. If a handling fee is requested the amount will be indicated here:

³ "Third Party" shall mean any person other than the NBRI and the Recipient.

I understand that any Material supplied to me by NBRI pursuant to this Agreement will be subject to, and I agree to comply with, the conditions above, and the additional conditions in the Schedule attached.

Trine Bilde

INSTITUT FOR BIOSCIENCE
Aarhus Universitet
Ny Munkegade 114-116
8000 Aarhus C

for and on behalf of

Name of the Recipient: Trine Bilde

Title: Professor, Dr.

Date: 28 January 2019

Address of the Recipient:
Department of Bioscience
Aarhus University
Ny Munkegade 116
Building 1540 – 2nd floor – office 221
DK - 8000 Aarhus C
Denmark

SIGNED BY:

S. J. Carr

for and on behalf of the NBRI

Name: S. J. CARR

Title: SENIOR FORESTER

Date: 15 FEBRUARY 2019

MATERIAL TRANSFER AGREEMENT SCHEDULE

Material supplied to:

Prof Trine Bilde, Dept of Bioscience
Aarhus University
Bygning 1540
Ny Munkegade 116
DK-8000 Aarhus
Denmark

By:

National Botanical Research Institute
P/Bag 13184
Ministry of Agriculture, Water and Forestry
Windhoek
Namibia

Schedule and Research Permit Number:

Collector's Number	Species	Material (seeds, bark etc)	Purpose
Research Permit Number (s): RPIV000122017			
RPIV0001 22017	<i>Arthrobacter woluwensis</i> NM-35	<i>Stegodyphus domicola</i> spider nests	16S rRNA analysis of microbiota diversity
RPIV0001 22017	<i>Bacillus subtilis</i> SB-14	<i>Stegodyphus domicola</i> spider nests	16S rRNA analysis of microbiota diversity
RPIV0001 22017	<i>Staphylococcus sciuri</i>	<i>Stegodyphus domicola</i> spider nests	16S rRNA analysis of microbiota diversity

Amendment of conditions

Regarding the deposition of bacterial cultures in public collections for the purpose of valid species description:

8. Permission is granted to deposit the above named strains of microorganisms in the Leibniz-Institut DSMZ - Deutsche Sammlung von Mikroorganismen und Zellkulturen GmbH public and these strains may be made available for strictly scientific purposes only under the user agreement of the respective culture collections. The user agreements should be no less restrictive than the conditions originally signed with NBRI.

9. The research of the strains made available by the respective culture collections to further users under this agreement (clause 8) shall be limited to scientific purposes. Any use for commercial research - including genome sequencing - or any use for commercial applications is excluded and requires prior written permission from the NBRI.

10. The above public culture collection making available the strain(s) for scientific purposes shall inform the NBRI in writing of such writing of such.
